

WB010 is a unisex RFID wristband with a **nylon strap and adjustable Velcro fastener**. The dial is made of a printable ABS and is available only in solid black. It can be customised using pad printing; serial numbering is applied using laser technology. With **European and US UHF and UCODE 8 chip**, this wristband can

be read up to a distance of 3 metres!

MARKETS

The **IP67** rating ensures resistance to water and dust. The adjustable fastener is designed for comfort and convenience, making the WB010 wristband the **ideal choice**

for access control and identification at companies, hospitals, hotels and leisure clubs, campsites, tourist resorts, amusement parks, spas and swimming pools.

European frequency (EU) 868 MHz - US frequency 920 MHz
