

## RFID HARD TAGS HP099

### MARKETS:

Waste  
management

Industry

Logistics

### COLOUR:

White

HP099 is a PVC RFID hard tag, a thermoplastic material characterised by its flexibility and ductility.

Rectangular in shape, this RFID tag is available in white, measures **60 x 25 mm** and weighs 3.5 grams.

HP099 **can be attached to both metallic (on request) and non-metallic surfaces** by screwing it in place, thanks to the two side holes. Operating at **LF frequency**, its **RFID chip is the SIC279**.

The HP099 can be customised using offset printing and screen printing, whilst numbering is carried out using inkjet and/or laser technology.

### MARKETS

Thanks to its **IP67** protection rating, the HP099 RFID hard tag is water-resistant and sealed against fumes and dust. It is ideal for use in the **asset management and waste management sectors**.

frequency 125 kHz

#### RFID features

Chip	Memory	ISO Standard
SIC279	16/24 bytes	ISO 11784 / 11785

#### Technical specifications

Application	Metal (on request)/non-metal surfaces
IP rating	67
Dimensions	60 x 25 mm
Material	PVC
Weight	3.5 g
Application method	Screwing
Operating temperature	-30°C ~ +50°C
Storage temperature	0°C ~ +50°C

#### Customisation

Colour	White
Type of printing	Offset printing, silkscreen printing
Type of numbering	Laser, inkjet technology
